

TAICHI MEME TOKEN (\$TAICHI) — LITEPAPER v4

Opening

A lot of projects talk. Some shout. Some panic. This one stands.

The Orange Grand Master is not an idea. Not a concept. Not a slogan.
It is posture. Discipline. Control.

Because in markets, as in life, the people who lose are the ones who flinch first.

The Philosophy

The utility is control.

Not the manipulative kind. Not the influencer kind.
The Tai Chi kind.

Control of breath.
Control of posture.
Control of emotion.
Control of timing.

When Tai Chi is done correctly, force becomes flow.
Flow becomes water.

The Grand Master

The Orange Grand Master trained while others posted.
He centred while others rushed.
He breathed while others screamed “BUY” like it was a religion.

They thought speed was power. They were wrong.

Around him, the students watch closely. Some understand. Some don't.
He assures them they do. They agree immediately.
